

Why School can be Cool

By Alyssamarie

You may think school is boring and only boring. But what if we didn't have school? Think of how school can be fun; seeing friends, going to specials, playing outside, I really like school.

Specials

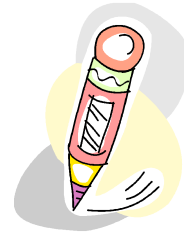

I asked some kids in my class what their favorite special is and P.E. was most popular. I also asked them what they liked about it they told me they liked it because it is fun to do SWRC. SWRC is a minecerkis but it is only kids performing and it is in a school. Some things that we do in SWRC are spinning plates (someone holding or balancing a plate spinning on a stick and the person may be doing tricks with it). We also jugill, do dioblows and trick sticks and ride on unecycikels. They also told me they like to play Mexican jumping beans. Mexican Jumping Beans is like doge ball but it is with a soft ball and there are different levels. Finally seeing friends, playing to geather, and much more. Music was second favorite they enjoy singing, ringing bells, the

fifth grade play, the teacher, joking around and more.

Fun Games in Lessons

You can make flash cards for stuff like math, since, sochell studies, spelling, and other subjects. All you need to do is get some index cards on one side write the question and on the other side right the ancners. Write a small check when you get it right and an x when you get it wrong when you have ten to fifteen checks take a test about that thing and the ones you got wrong still pratece them.

Free Time with Friends

Class time is **NOT** the time to talk and play. The time to talk and play is at lunch time (free period).

Some things kids like to do with friends are talk, hang out, goof around, play games, and more. What do you like to do with friends?
